Le equazioni per i singoli nodi sono

$$\begin{split} \langle \dot{S}_{3} \rangle &= -\tau \left(\langle S_{3}I_{1} \rangle + \langle S_{3}I_{4} \rangle \right), & \langle \dot{S}_{1} \rangle &= -\tau \left(\langle I_{3}S_{1} \rangle + \langle I_{4}S_{1} \rangle + \langle S_{1}I_{2} \rangle \right), \\ \langle \dot{I}_{3} \rangle &= & \tau \left(\langle S_{3}I_{4} \rangle + \langle S_{3}I_{1} \rangle \right) - \gamma \langle I_{3} \rangle & \langle \dot{I}_{1} \rangle &= & \tau \left(\langle I_{3}S_{1} \rangle + \langle I_{4}S_{1} \rangle + \langle S_{1}I_{2} \rangle \right) - \gamma \langle I_{1} \rangle, \\ \langle \dot{S}_{4} \rangle &= & -\tau \left(\langle I_{3}S_{4} \rangle + \langle S_{4}I_{1} \rangle \right), & \langle \dot{S}_{2} \rangle &= & -\tau \langle I_{1}S_{2} \rangle, \\ \langle \dot{I}_{4} \rangle &= & \tau \left(\langle I_{3}S_{4} \rangle + \langle S_{4}I_{1} \rangle \right) - \gamma \langle I_{4} \rangle, & \langle \dot{I}_{2} \rangle &= & \tau \langle I_{1}S_{2} \rangle - \gamma \langle I_{2} \rangle. \end{split}$$

Tali equazioni dipendono da alcune coppie: tutte le disposizioni di archi con un nodo suscettibile ed un uno infetto. Abbiamo bisogno di equazioni addizionali

$$\begin{split} \langle S_3 I_4 \rangle &= \quad \tau \langle S_3 S_4 I_1 \rangle - (\tau + \gamma) \, \langle S_3 I_4 \rangle - \tau \langle S_3 I_4 I_1 \rangle, \\ \langle S_3 I_1 \rangle &= \quad \tau \left(\langle S_3 I_4 S_1 \rangle + \langle S_3 S_1 I_2 \rangle \right) - (\tau + \gamma) \, \langle S_3 I_1 \rangle - \tau \langle S_3 I_4 I_1 \rangle, \\ \langle I_3 S_4 \rangle &= \quad \tau \langle S_3 S_4 I_1 \rangle - (\tau + \gamma) \, \langle I_3 S_4 \rangle - \tau \langle I_3 S_4 I_1 \rangle, \\ \langle S_4 I_1 \rangle &= \quad \tau \left(\langle I_3 S_4 S_1 \rangle + \langle S_4 S_1 I_2 \rangle \right) - (\tau + \gamma) \, \langle S_4 I_1 \rangle - \tau \langle I_3 S_4 I_1 \rangle, \\ \langle I_3 S_1 \rangle &= -\tau \left(\langle I_3 I_4 S_1 \rangle \langle I_3 S_1 I_2 \rangle \right) - (\tau + \gamma) \, \langle I_3 S_1 \rangle + \tau \langle S_3 I_4 S_1 \rangle, \\ \langle I_4 S_1 \rangle &= -\tau \left(\langle I_3 I_4 S_1 \rangle + \langle I_4 S_1 I_2 \rangle \right) - (\tau + \gamma) \, \langle I_4 S_1 \rangle + \tau \langle I_3 S_4 S_1 \rangle, \\ \langle S_1 I_2 \rangle &= -\tau \left(\langle I_3 S_1 I_2 \rangle + \langle I_4 S_1 I_2 \rangle \right) - (\tau + \gamma) \, \langle S_1 I_2 \rangle, \\ \langle I_1 S_2 \rangle &= \quad \tau \left(\langle I_3 S_1 S_2 \rangle + \langle I_4 S_1 S_2 \rangle \right) - (\tau + \gamma) \, \langle I_1 S_2 \rangle. \end{split}$$

Per le triple

$$\begin{split} \langle S_3 \dot{S}_4 I_1 \rangle &= \quad \tau \langle S_3 S_4 S_1 I_2 \rangle - (2\tau + \gamma) \, \langle S_3 S_4 I_1 \rangle, \\ \langle S_3 \dot{I}_4 I_1 \rangle &= \quad \tau \left(\langle S_3 S_4 I_1 \rangle + \langle S_3 I_4 S_1 I_2 \rangle \right) - 2 \left(\tau + \gamma \right) \, \langle S_3 I_4 I_1 \rangle + \tau \langle S_3 I_4 S_1 \rangle, \\ \langle S_3 \dot{I}_4 S_1 \rangle &= - \tau \langle S_3 I_4 S_1 I_2 \rangle - (2\tau + \gamma) \, \langle S_3 I_4 S_1 \rangle, \\ \langle I_3 \dot{S}_4 I_1 \rangle &= \quad \tau \langle S_3 S_4 I_1 \rangle - 2 \left(\tau + \gamma \right) \, \langle I_3 S_4 I_1 \rangle + \tau \langle I_3 S_4 S_1 \rangle + \tau \langle I_3 S_4 S_1 I_2 \rangle, \\ \langle I_3 \dot{S}_4 S_1 \rangle &= - \tau \langle I_3 S_4 S_1 I_2 \rangle - (2\tau + \gamma) \, \langle I_3 S_4 S_1 \rangle, \\ \langle I_3 \dot{I}_4 S_1 \rangle &= \quad \tau \left(\langle S_3 I_4 S_1 \rangle + \langle I_3 S_4 S_1 \rangle - \langle I_3 I_4 S_1 I_2 \rangle \right) - 2 \left(\tau + \gamma \right) \, \langle I_3 I_4 S_1 \rangle. \end{split}$$

Mancano

$$\begin{split} &\langle I_3S_1I_2\rangle = -2\left(\tau + \gamma\right)\operatorname{ciap}\langle I_3S_1I_2\rangle + \tau\langle S_3I_4S_1I_2\rangle - \tau\langle I_3I_4S_1I_2\rangle \\ &\langle I_3S_1S_2\rangle = -\left(\tau + \gamma\right)\langle I_3S_1S_2\rangle + \tau\langle S_3I_4S_1S_2\rangle - \tau\langle I_3I_4S_1S_2\rangle \\ &\langle S_4S_1I_2\rangle = -\left(\tau + \gamma\right)\langle S_4S_1I_2\rangle - 2\tau\langle I_3S_4S_1I_2\rangle \\ &\langle I_4S_1I_2\rangle = -2\left(\tau + \gamma\right)\langle I_4S_1I_2\rangle + \tau\langle I_3S_4S_1I_2\rangle - \tau\langle I_3I_4S_1I_2\rangle \\ &\langle I_4S_1S_2\rangle = -\left(\tau + \gamma\right)\langle I_4S_1S_2\rangle + \tau\langle I_3S_4S_1S_2\rangle - \tau\langle I_3I_4S_1S_2\rangle \\ &\langle S_3S_1I_2\rangle = -2\tau\langle S_3I_4S_1I_2\rangle - (\tau + \gamma)\langle S_3S_1I_2\rangle \end{split}$$

e le quadruple

$$\begin{split} \langle I_3I_4S_1I_2\rangle &= -3\left(\tau+\gamma\right)\langle I_3I_4S_1I_2\rangle + \tau\left(\langle S_3I_4S_1I_2\rangle + \langle I_3S_4S_1I_2\rangle\right) \\ \langle S_3I_4S_1I_2\rangle &= -\left(3\tau+2\gamma\right)\langle S_3I_4S_1I_2\rangle \\ \langle I_3S_4S_1I_2\rangle &= -\left(3\tau+2\gamma\right)\langle I_3S_4S_1I_2\rangle \\ \langle I_3I_4S_1S_2\rangle &= \tau\left(\langle S_3I_4S_1S_2\rangle + \langle I_3S_4S_1S_2\rangle\right) - 2\left(\tau+\gamma\right)\langle I_3I_4S_1S_2\rangle \\ \langle I_3S_4S_1S_2\rangle &= -\left(2\tau+\gamma\right)\langle I_3S_4S_1S_2\rangle \\ \langle S_3I_4S_1S_2\rangle &= -\left(2\tau+\gamma\right)\langle S_3I_4S_1S_2\rangle \\ \langle S_3S_4S_1I_2\rangle &= -\left(\tau+\gamma\right)\langle S_3S_4S_1I_2\rangle \end{split}$$
